

DUNVILLE SERVICE LINE REPLACEMENT PROJECT

The Town of Placentia wishes to advise residents that work will commence on the replacement of service lines in Dunville this month. The construction zone for this phase will extend from Station Road to the Fewers Road area. The work entailed will require frequent interruption to water services for some residents of Dunville, reduced traffic flow and disruption to private and public property within this construction zone. Your patience over the duration of the project would be appreciated to allow this work to progress with an aim to providing better services to the community.

This project is being overseen by the Town's consultant, Progressive Engineering and Consulting Inc. and the work is being performed by M. J. Hickey Contracting Ltd. If you have questions or concerns regarding construction related issues on this project, please contact the on-site supervisor as the first line of contact:

1. Charlie Power, On-Site Supervisor (226-0173)
2. Arthur Smith, Project Manager (687-9878)
3. Darryl Mills, Project Engineer (682-9758)

All other concerns may be addressed to Town of Placentia's Public Works Supervisor at 227-4316.

Thank you in advance for your cooperation and patience.

WAYNE D. POWER
Mayor
