PROJECT DESCRIPTION

In 2023 the Town of Placentia had the area around the monument in Fort Frederick from the guardrail on Prince William Drive to the retaining wave wall on Orcan Drive regraded and landscaped as part of the overall site upgrades. At that time the property was rebuilt with topsoil and hydroseeded. At this time we are requesting quotes to supply and spread lime and fertilizer application to improve the quality of the grass area. We are requesting quotes as indicated below. The application of the supplied materials will be required twice per year – once in June and once in late August.

PRICE QUOTE

Note: the quantities listed below will cover all requirements of the quote - i.e. one application of 30 bags of lime and 10 bags fertilizer in June and a second application of 30 bags of lime and 10 bags of fertilizer in August.)

QUANTITY	DESCRIPTION	PRICE QUOTE	HST	TOTAL
60	15kg bags of pelletized lime			
20	25lkg bags of 15-15-15 fertilizer			
2	Labour cost for two applications
