

REQUEST FOR QUOTES

Leak Repair – RFQ 10-06-25LD2

Issue Date: Monday, October 6, 2025

Mandatory Site Visit: Wednesday, October 8, 2025 10:00 AM
(Town Hall, Patterson Drive)

Submission Deadline: October 10, 2025

1. PROJECT LEAD – CONTACT INFORMATION

Town of Placentia

Rodney Cooney, Public Works Foreman

Cell: 709-227-1534 Email: rcooney@placentia.ca

2. BACKGROUND

The Town of Placentia faces growing challenges in maintaining its water supply due to aging infrastructure, increasing demand and the lack of state of the art equipment to identify undetected leaks in the distribution system. Due to the increasing loss of potable water, it was Council's decision to retain the services of an independent company to undertake a leak detection program from which it was revealed that the Town has an excessive amount of water leaks. The need has been identified to begin immediate repair of the larger leaks that result in a significant loss of the Town's chlorinated water which is the purpose of this Request for Quotations (RFQ).

Bidders are advised that the work identified will be completed under the general supervision of the Town of Placentia's Public Works management staff.

PROJECT DELIVERABLES

A. Project Location (s)

- i. Jerseyside Hill at the location of the Town owned booster station
- ii. Jerseyside Hill across from the Town owned booster station
- iii. Cabot Street, Jerseyside – two locations

- B.** The contractor will be required to undertake all work related to completing the leak repairs from start to finish at the above four locations. The work will include the following as well as any other unidentified necessities that may arise during the course of the work; prices should be all inclusive for the following:

Supply all labour and required equipment and meet all procedures necessary to repair the leaks outlined above including:

- i. Mobilization and Demobilization
- ii. Removal of asphalt (where required) and disposal of same at an approved location;
- iii. Dewatering as required;
- iv. Bedding around pipes;
- v. Leak Repair
- vi. Excavation & Backfilling
- vii. Site remediation
 1. Supply asphalt patching – Approximately 110 m² estimated
(1 layer 50mm asphalt and 100mm of Class A at all required locations)

C. The Contractor shall also:

- i. Ensure compliance with Occupational Health and Safety standards including the placement of barricades and sufficient qualified flag persons.

D. All bidders should note: the Town of Placentia will supply pipe and fittings required to complete repair.

3. TIMELINES
